

## Anterior Night Splint

Designed to hold the foot in a neutral position, helping to alleviate morning pain and discomfort associated with plantar fasciitis. Non-stretch straps hold the foot in a neutral position which reduces passive plantar flexion during rest or while sleeping. Indicated for Plantar Fasciitis, Achilles Tendonitis, foot drop, muscle tightening or any condition where stabilization of the ankle/foot in a neutral position is desired. Lightweight and low profile. Fits right or left.

### Features:

- Lightweight and cool, low profile design is less bulky for patient compliance
- Padded non-stretch straps hold the splint in place for proper foot positioning

Size	Women's Shoe	Men's Shoe
MD	6 - 10	5 - 9
LG	10 - 15	9 - 14

## PF Night Splint

Designed to comfortably position the foot in a controlled amount of dorsiflexion. Stretches the Plantar Fascia and Achilles tendon to help relieve pain and speed healing of Plantar Fasciitis or Achilles Tendonitis. Adjustable straps control the amount of dorsiflexion and keep the splint in place. Durable plastic shell with soft, moisture wicking liner. Indicated for Plantar Fasciitis, Achilles Tendonitis, Plantar Flexion Contractures and Muscle Tightening. Non-slip pad. Fits right or left.

### Features:

- Adjustable straps control the amount of dorsiflexion
- Padded straps with lock buckles for comfortable wear and easy application
- Lightweight shell with padded liner
- Includes optional toe wedge for even greater stretch
- Non-slip pad

Approved for HCPCS Code L4396

## Figure-Eight Ankle Support

Ideal for supporting weak or injured ankles during sports and activities. Effective treatment and prevention of ankle sprains and injuries. Popular lace up design with stabilizing figure-eight straps that mimic athletic taping by providing inversion/eversion support and compression. Indicated for ankle strains, mild to moderate ankle sprains, chronically weak ankles and prophylactic use during sports. Fits right or left. Color: Black.

### Features:

- Stabilizing figure-eight straps mimics ankle taping, secures heel and foot in place
- Wide elastic cuff closure holds straps in place and provides added stability and compression
- Lace-up design is easy to apply and provides a conforming fit
- Ballistic nylon material is extremely lightweight and thin with long-lasting strength
- Low profile, easy to wear and fits in a variety of shoes
- Breathable tongue and heel with advanced material wicks moisture away from the skin and allows air to circulate. Tongue is sewn in place to reduce movement.

Approved for HCPCS Code L1902

## Custom DVT Compression Garments

Custom DVT compression garments designed to match your proprietary pump and manufactured to your unique specifications with multiple wrap and tubing options.

### Features:

- Available with removable bladder or as a disposable unit
- Sequential and intermittent garments available
- Foot, calf or calf and thigh lengths
- Comfortable, breathable, non-stretch materials
- Hook and loop fasteners for adjustability and easy application

### Sequential DVT garments

(for use with sequential pumps):

3 individual chambers, each with its own elbow and inflation tube.

### Intermittent DVT garments

(for use with intermittent pumps only):

1 chamber and 1 tube. Bar sealing available to divide into a "z-shaped" chamber.

### Wrap Options:

- Non-woven fabric inner laminated to PVC or PU
- UBL outer laminated to PVC or PU
- UBL/Foam/Tricot with appliqué blader
- Variety of size options
- Bladder may be welded to wrap

### Tubing Options:

- Length, ID/OD and material (PVC or PU) based on your specifications
- Available in clear, natural (PU) or a variety of colors
- Connects to pump with Luer Lock or CPC™ connector

## Economy Stirrup Ankle Brace

Two medial/lateral plastic shells with soft foam liners conform to the malleoli of the ankle for support and a conforming fit. Comfortable, soft fabric lining against the skin. Universal design fits left or right. Ideal for sprains, strains, or after cast removal. Color: White.

**Features:**

- Rigid plastic shells provide medial/lateral stabilization to the ankle joint
- Soft foam liners conform to the ankle for support without any pressure points
- Adjustable heel piece fits a range of sizes
- Adjustable straps are quick and easy to apply with a wide range of adjustability

Approved for HCPCS Code L4350

## Foam and Gel Stirrup Ankle Brace

Two medial/lateral plastic shells with foam and gel-filled liners conform to the malleoli of the ankle for intimate support and a conforming fit. The liners can be removed and placed in the freezer for cold therapy. Soft fabric lining against the skin. Ideal for sprains, strains, or after cast removal. Universal left or right. Color: White.

**Features:**

- Adjustable heel piece fits a range of sizes
- Rigid plastic shells provide medial/lateral stabilization to the ankle joint
- Gel and foam liners conform to the ankle without any pressure points. Gel portion is positioned around the ankle bone. Suitable for cold therapy
- Adjustable straps are quick and easy to apply with a wide range of adjustability
- Comfortable in most athletic shoes

Approved for HCPCS Code L4350

## Pneumatic Stirrup Ankle Brace

Two medial/lateral plastic shells lined with air bladders provide support and stability to the ankle joint. Pre-inflated, full-length air bladders pulsate while walking to give a massaging effect. Two adjustable riveted swivel straps ensure proper application. Universal sizing. Fits right or left. Color: White/Green.

**Features:**

- Rigid plastic shells provide medial/lateral stabilization to the ankle joint
- Air/foam liners with air bladders provide a massaging effect to the ankle while walking. Bladders have a foam backing for additional padding and comfort
- Adjustable heel piece fits a range of sizes
- Adjustable straps are quick and easy to apply with a wide range of adjustability
- Comfortable in most athletic shoes

Approved for HCPCS Code L4350

## Square Toe Post-Op Shoe

An extremely light weight medical/surgical shoe designed to provide ultimate protection and comfort in post-operative footwear.

### Features:

- Square toe design with extended shape provides extra protection for toes, forefoot and bandages
- Adjustable forefoot closure expands to accommodate dressings
- Removable insole can be customized to relieve pressure
- Non-slip rocker bottom for a smooth, natural gait
- Adjustable ankle strap eliminates heel slippage
- Breathable material wicks moisture away from the skin
- Semi-rigid sole for support and shock absorption

[See chart below for sizing options](#)

## Super Shoe

Designed for wear after soft tissue procedures or post-operative care. Especially useful for geriatric and diabetic patients with loss of sensation. Adjustable straps accommodate bulky dressings. Removable trim-fit tongue for a secure fit. Semi-rigid, non-skid sole. Color: Blue. Fits right or left.

### Features

- Rocker sole for natural gait
- Molded heel counter
- Breathable mesh upper with soft lining reduces perspiration and shear
- Removable, trimmable tongue
- Adjustable hook and loop closures
