

## Neoprene Knee Sleeves

Standard pullover neoprene sleeve provides compression with therapeutic warmth. Neoprene is 3mm thick with double layer for added compression around the knee joint. Indicated for mild knee strains/sprains, Arthritis, knee contusions and meniscal tears. Available in open or closed patella. Color: Black.

### Features:

- Basic neoprene sleeve
- Easy slip-on style
- Double layer around knee joint
- Available in open or closed patella

Size	Circumference at Knee Center
SM	13" - 14"
MD	14" - 15"
LG	15" - 16"
XL	16" - 18"
2XL	18" - 20"
3XL	20" - 22"
4XL	22" - 24"

## Hinged Knee Brace

Steel support hinges help prevent hyperextension and provide side-to-side stability. Sports neoprene in 4mm thickness for compression and therapeutic warmth. Built-in donut support controls patella alignment. Two adjustable straps. Open patella and popliteal. Indicated for mild knee strains/sprains, meniscal tears, Arthritis and Patella Subluxation. Color: Black.

### Features:

- Medial/lateral support hinges help to prevent knee hyperextension and provide joint stabilization
- Donut patella support gives added patella stability
- Open patella and popliteal
- Two adjustable straps

Approved for HCPCS Code L1810

## ROM Knee Brace

Adjustable knee brace allows for progressive rehabilitation. The ROM hinges have flexion and extension settings that can be adjusted in 15-degree increments to control movement of the joint, preventing further injury and speeding the healing process. Sports neoprene in 4mm thickness for compression and therapeutic warmth. Wrap design with easy to use front closures. Two adjustable support straps. Open patella. Indicated for mild to moderate ligament strains/sprains, medial or lateral instability, meniscal strains and tears, chronic knee instability or post-arthroscopic surgery. Color: Black.

### Features:

- Medial/lateral ROM hinges help control the joint movement with adjustable flexion/extension settings
- Wrap design is easy to apply and remove
- Two adjustable straps

Approved for HCPCS Code L1832

## Universal Knee Support with Horseshoe Buttress

Easy to apply or remove with simple wrap design that fits a range of sizes. Ideal for swollen or injured knees. The U-shaped inferior buttress increases patella stability and improves patella tracking. 3mm thick neoprene provides compression and therapeutic warmth. Indicated for mild knee strains/sprains, Chondromalacia, Patellar Instability, Patella Subluxation, edematous knee, and Patellar Tendonitis. Universal size fits a range of sizes. Color: Black.

### Features:

- Wrap around design is easy to apply and remove
- Inferior horseshoe buttress for patella stability

# Economy Trim-Fit Universal Knee Immobilizer

Universal knee immobilizer is made of soft, breathable foam laminated with loop fabric. Immobilization is obtained by five contoured posterior stays. Six easy hook and loop closures. Includes a removable, latex free elastic patella closure. Universal size. Available in 14"-22" lengths. Latex free. Color: Black.

## Features:

- Cut-away/trimmable design can be trimmed to fit a range of sizes
- Contoured posterior stays and medial/lateral stays provide total knee immobilization
- Moveable medial/lateral stays can be placed in any desired position or angle
- Adjustable straps

Approved for HCPCS Code L1830

19"	16" - 25"	10" - 19"
22"	16" - 25"	10" - 19"

# Three Panel Knee Immobilizer

Popular universal knee immobilizer side panels are made of a soft, breathable tri-laminate material, canvas outer, 3/8" breathable foam, and soft tricot lining. Posterior panel made from loop material to allow for full adjustability when attaching side panels. Contoured posterior stays for immobilization and medial/lateral stays for increased stability. Six easy hook and loop closures. Available in 12"-24" lengths. Latex free. Color: Black.

## Features:

- Tri-panel design is fully adjustable to fit a range of sizes
- Contoured posterior stays and medial/lateral stays provide total knee immobilization
- Adjustable straps

Approved for HCPCS Code L1830

# Compression Knee Immobilizer (3" wide)

3" wide latex free elastic straps for uniform compression. Removable medial and lateral stays can be placed in any desired position or angle. Made of soft, breathable foam laminated with loop fabric. Surged edges for increased comfort and durability. Immobilization is obtained by three contoured posterior stays. Includes an elastic patella closure. Universal size. Available in 13"- 23" lengths. Color: Black.

## Features:

- Contoured posterior stays and medial/lateral stays provide total knee immobilization
- Removable medial/lateral stays

Approved for HCPCS Code L1830
