

REMINGTON

INTERNATIONAL, LTD.

COMPANY OVERVIEW

In 2007, Remington Products Company founded Remington International, LTD. (RIL). RIL is a wholly American-owned manufacturing facility in Vietnam, which allows us to continue providing quality products at competitive prices.

Our 126,000 ft² manufacturing facilities are located in a modern industrial park that provides easy access to a new sea port. RIL manufacturing practices are based on U.S. quality standards and combine Remington capabilities along with cut-and-sew assembly, Radio Frequency (RF) heat sealing, EVA injection molding, and hot/cold compression molding, to offer the finest products available.

RIL provides the option to buy containers directly from Vietnam or ship smaller loads from our distribution center in Ohio, where safety stock can be warehoused for reduced lead times. Orders are placed with a U.S. based customer service team for your convenience.

SERVICES AND CAPABILITIES
