

## Elastic Rib Belts

Elastic belts stabilize rib and sternum strains and fractures by limiting expansion through compression. Provides comfort and encourages more controlled breathing to help reduce pain. Long loop strips for an adjustable fit and universal size. Female version features a lower front to contour around the bust line. Easy to wear under most clothing. Specify for men or women. 6" Height. Latex free. Color: White.

**Features:**

- Latex free elastic
- Universal design
- Adjustable hook and loop closure

Size	Rib Circumference	Back Height	Front Height
WOMEN	24" - 50"	6"	3 1/2"
MEN	24" - 50"	6"	6"

## Elastic Abdominal Binder

Abdominal binder provides support to abdominal muscles weakened by repeated surgery, pregnancies or inactivity. All elastic construction for maximum compression with long hook and loop closures for an improved fit. Plush elastic material contours to the shape of the body. Flexible, posterior anti-roll stays help keep the binder in place. 10" Height. Universal Design. Latex free. Color: White.

**Features:**

- Plush, latex free elastic
- Universal design
- Adjustable hook and loop closure

## Universal Lumbar Sacral Support

Provides compression to the lumbar sacral and abdominal regions, stabilizing and supporting these areas to provide relief from lower back pain and discomfort. Ten inch high elastic back panel with foam/flannel laminated material on the side panels. The tapered panels contour the body for excellent compression and support. Elastic side pulls give additional support and compression. Flexible stays provide stability to the lumbar region and hold the support in place. Low profile for inconspicuous wear underneath clothing. 10" Height. Universal sizing. Color: Black.

**Features:**

- High quality elastic and foam/flannel laminate construction
- Elastic side pulls for added support and compression
- Flexible plastic stays increase stabilization

Size	Hip Size	Back Height	Front Height
UNIV	28" - 46"	10"	6"
UNIV-LONG	46" - 60"	10"	6"
